# Hydejack

Hydejack is a Jekyll theme with JavaScript powers, combining the best of static sites and modern web apps.
It features a suite of JavaScript that makes the page feel like an app, without sacrificing backwards-compatibility,
page-load speed or SEO.

> Your presence on the web — A blog, a portfolio and a resume.

Hydejack aims to be the complete package for professionals on the web.
It features a blog suitable for both prose and technical documentation,
a showcase for your projects, and a resume that fits with the rest of the design.

Demo

It's best to just see it in action.

Features

Both versions include these features:

- Full in-app page loading, powered by hy-push-state
- A customizable sidebar that turns into a drawer menu on mobile, powered by hy-drawer
- Advanced FLIP animations, inspired by Material Design
- Good Google PageSpeed Score[^3]
- Higher *perceived speed* thanks to content pre-fetching
- Syntax highlighting, powered by Rouge
- LaTeX math blocks, powered by KaTeX
- Change the wording of built-in strings and possibly translate in other languages
- Support for categories and tags
- Built-in icons for many social networks
- Simple and semantic HTML — can be viewed even with text-based browsers
- Author section below each article and support for multiple authors
- Progressive enhancement — sacrifice features, not content
- Google Analytics and Google Fonts support
- Disqus comments
- Print layout — Used to render Hydejack's PDF documentation
- Blog layout via `jekyll-paginate` (optional)
- SEO meta tags via `jekyll-seo-tag` (optional)
- Github avatars via `jekyll-avatar` (optional)
- Gist support via `jekyll-gist` (optional)

Documentation

Hydejack is well documented. You can read the docs on the Jekyll site, or on GitHub, or download the PDF.

Download

There are two versions of **Hydejack**: The *free version* includes basic blogging functionality, as did previous versions of the theme.
The *PRO version* includes additional features for professionals:
A portfolio, a resume layout and a welcome page to feature your favorite projects and posts.

This table details what is and isn't included in each respective version.

	Free	PRO
Blog		

Features		
Portfolio Layout		
Resume Layout		
Welcome Layout		
Newsletter Box		
Custom Forms		
No Hydejack Branding		
License	GPL-3.0	PRO
Source	GitHub	Included
Support[^1]	No	No
Price	Free	$29
	Download	**Buy Now - $29** [^2]
{:.stretch-table}		

[^1]: You MAY open an issue on GitHub, but no response and/or fix is guaranteed.
You understand that using Jekyll requires technical know-how, and is NOT comparable to Wordpress in terms of usability.
Please use the free version to confirm that Hydejack works for you.
For more, see the PRO license.

[^2]: Transactions secured by Stripe. Downloads handled by Simple Goods.

[^3]: Actual page load speed depends on your hosting provider, resolution of embedded images and usage of 3rd party plugins.
